

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, listings, of claims in the application:

Listing of Claims:

1. (Cancelled)

2. (New) A fastener assembly for securing a side cover to a frame of a computer case, the assembly comprising:

a) a frame having a plurality of guiding holes, each guiding hole including a horizontal guiding slit, a sideways bracing and a pair of bracing holes above and below the guiding slit;

b) a side cover mountable onto the frame, the side cover including a bent edge having a C-shaped hole;

c) a clamp including a clamping piece and a clamp socket,

i. the clamping piece including a pair of rounded axles, disposed on upper and lower sides at a rear end thereof, a pushing piece on a front end thereof and a pressure piece on a side thereof, and

ii. the clamp socket including a central slit for receiving the clamping piece, a pair of rounded axle sockets on upper and lower ends of the central slit for receiving the pair of rounded axles, upper and lower fastening hooks formed on a front side thereof for engaging the bracing holes, and a backward hook on a backside thereof for engaging the sideways bracing; and

d) wherein after the clamp is mounted to the frame and the side cover is

Application No.: 10/621,517
Art Unit: 3637
Examiner: Janet Marie Wilkens

positioned onto the frame, pushing the pushing piece causes the clamping piece to pivot about axle sockets and engage within the C-shaped hole, thereby causing the pressure piece to exert pressure to the bent edge of the side cover and secure the side cover to the frame.
